-I- FUNCTION: PYRUVATE CARBOXYLASE CATALYZES A 2-STEP REACTION, INVOLVING THE ATP-DEPENDENT CARBOXYLATION OF THE COVALENTLY ATTACHED BIOTIN IN THE FIRST STEP AND THE TRANSFER OF THE CARBOXYL GROUP TO PYRUVATE IN THE SECOND.
-I- CATALYTIC ACTIVITY: ATP + pyruvate + HCO(3)(-) = ADP + phosphate +
                                                                                                                                                                                                         <del>-</del>

Hoffman N.E., Pichersky E., Cashmore A.R.;
"A tomato cDNA encoding a biotin-binding protein.";
Nucleic Acids Res. 15:3928-3928(1987).
-1- FUNCTION: THIS PROTEIN IS A COMPONENT OF THE ACETYL COENZYME A
-1-CARBOXYLASE COMPLEX; FIRST, BIOTIN CARBOXYLASE CATALYZES THE
CARBOXYLATION OF THE CARRIER PROTEIN AND THEN THE TRANSCARBOXYLASE
TRANSFERS THE CARROXYL GROUP TO FORM MALONYL-COA.

J. Biol. Chem. 273:5155-5166(1998).
-I- FUNCTION: PYRUVATE CARBOXYLASE CATALYZES A 2-STEP REACTION, INVOLVING THE ATP-DEPENDENT CARBOXYLATION OF THE COVALENTLY ATTACHED BIOTIN IN THE FIRST STEP AND THE TRANSFER OF THE CARBOXYL GROUP TO PYRUVATE IN THE SECOND. THE MAXIMUM ACTIVITY IS AT PH 8 AND 60 DEGREES CELSIUS.
-I- CATALYTIC ACTIVITY: ATP + pyruvate + HCO(3)(-) - ADP + phosphate +
                                                                                                                                                                                                                                                                                             This SWISS-PROT entry is copyright.                                                                                                                                                                                                                                                                                   CARRIER PROTEIN AND BIOTIN CARBOXYLTRANSFERASE.

CATALYTIC ACTIVITY: ATP + biotin-carboxyl-carrier protein + CO(2)

ADP + phosphate + carboxybiotin-carboxyl-carrier protein.

COFACTOR: BIOTIN.
                                                                                                                                                                                   AND SUBSTRATE BINDING ACTIVITY. SIMILARITY: TO OTHER BIOTIN-DEPENDENT ENZYMES
                                                                                                                                                                                                              PATHWAY: Long-chain fatty acid biosynthesis; first step. SUBUNIT: MULTIMER COMPRISED OF 2 DIFFERENT SUBUNITS; THE ONE (63/64 kDa) HAS BIOTIN CARBOXYLASE AND BIOTIN CARRIER FUNCTIONS, WHILE THE SMALLER SUBUNIT POSSESSES CARBOXYLTR.
                                                                                                                                                                    PHOSPHATE SYNTHETASES

                                                                                                                                                                              C. Natl. Acad. Sci. U.S.A. 91:5779-5
CATALYTIC ACTIVITY: ATP + 3-methylc
phosphate + 3-methylglutaconyl-CoA.
COFACTOR: Bottin.
                                PATHWAY: Leucine catabolism.
SUBUNIT: Probably a heterodimer composed of biotin alpha subunits and beta subunits (By similarity).
SUBCELLULAR LOCATION: Mitochondrial matrix.
TISSUE SPECIFICITY: In leaves, cotyledons and stem
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               IPAPLAGTVSKILVKEGDTVKAGQTVLVLEAMKMETEINAPTDGKVEKVLVKERDAVQGG
